## Contents

- RC Vehicle x 1
- 2.4GHz RC Transmitter x 1
- Instruction Manual x 1
- 6.4V rechargeable Battery Pack x 1
- USB Charger cable x 1
- 9V 6F22 Battery x 1

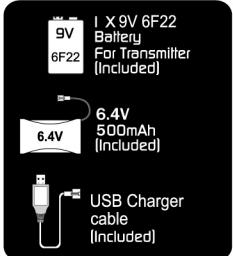

2.4GHz RC Transmitter x 1

RC Vehicle x 1

### BATTERY REQUIREMENTS:

### Battery Precaution

1. The 6.4 V rechargeable battery pack must be charged before use, using the USB Charger cable which is included.
2. Do not overcharge the battery pack. Do not charge for more than 6 hours
3. Do not charge the battery pack if it shows leakage, corrosion, or has loose or exposed wires or other damage
4. Do not cover the battery pack with any sort of materials while charging
5. Do not touch the battery pack when it is hot. Wait until the battery pack cools before installing it in the vehicle and before recharging
6. Do not dispose of the battery in fire
7. Do not dismantle the battery or USB Charger cable, and do not cut the battery or USB Charger cable.
8. The battery pack will be warm after charging, and hot after use in a vehicle
9. The supply terminals are not to be short-circuited
10. Rechargeable batteries are to be removed from the toy before being charged
11. Rechargeable batteries for adult charging only

12. Battery replacement must be only made by adults
13. The transformer (charger) is not a toy
14. Charge only type (500mAh Max) rechargeable battery packs. Other types of batteries may burst causing injury to persons and damage. This power unit is intended to be correctly orientated in a vertical or floor mount position. This charger is intended to be used for charging 6.4 V rechargeable battery pack with capacity 500mAH Max. It cannot be used for charging non-rechargeable batteries. Regularly examine the battery charger for any damage to the cord, plug, enclosure and other parts, and, in the event of such damage, it must not be used with the charger or battery pack until such damage has been repaired. Note that the 9V battery is non-rechargeable and is not to be recharged. Only batteries of the same or equivalent type as recommended are to be used. It will need replacement when transmission is poor.
15. Exhausted batteries are to be removed from the product.

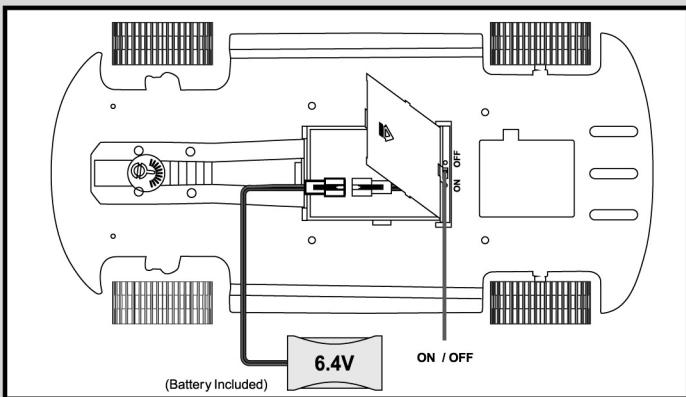

### Charging the Rechargeable Battery Pack for the Vehicle:

1. Connect the 6.4V rechargeable battery pack to the battery charger
2. Plug the charger into the standard USB socket
3. The charging time for a full charge is about 3 hours
4. The USB light is red when charging
5. When charging is completed, unplug the charger from the AC socket
6. Disconnect the rechargeable battery pack from the battery charger

## Battery Installation

### For Vehicle

1. Switch OFF the power
2. Turn all screw locks of the battery cover to the right
3. Open the battery cover
4. Install a new 6.4V battery pack with correct polarities (+/-) as shown inside the battery compartment
5. Close the battery cover
6. Turn all screw locks of the battery cover back to the center

### For Transmitter (Fig. 1 and Fig. 2)

1. Switch OFF the power
2. Unscrew the screw on the battery cover
3. Open the battery cover
4. Install 1 new 9V battery with correct polarity (+/-) as shown inside the battery compartment
5. Close the battery cover
6. Tighten the screw on the battery cover

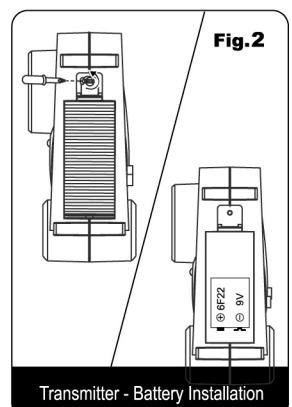

Fig.2

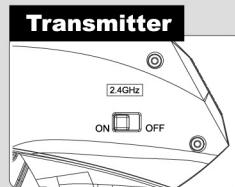

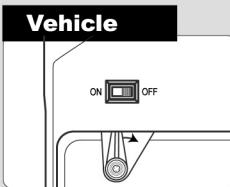

# HOW TO PAIR

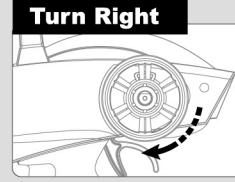

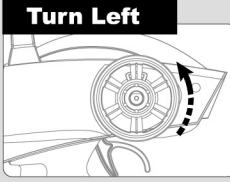

1. Turn on the vehicle first, then turn on the transmitter.
2. Keep pulling the trigger of the transmitter to match the vehicle.
3. When the vehicle is in operation, that means they are matched.
4. If it cannot complete this within 8 seconds, please turn off both the vehicle and transmitter and re-start the pairing process.
5. When the pairing process is done, whenever you switch the vehicle and transmitter on and off, it searches for the code that is memorised, and will only lock on to the transmitter signal containing that code
6. If you have more than two vehicles, please pair one by one. When the second vehicle is pairing, please always keep the first vehicle and transmitter on.
7. Please turn off both the vehicle and transmitter and re-start all pairing processes if changing to another 2.4GHz transmitter for use.

## How To Use

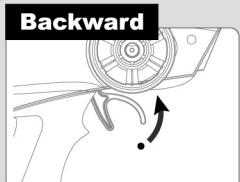

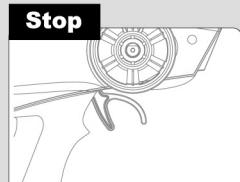

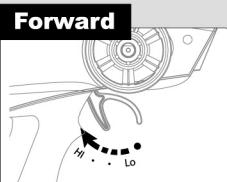

1. Switch ON the Vehicle and Transmitter.

2. Use the Steering Wheel to control the Vehicle turning left or right

3. Use the Accelerator Trigger to drive the Vehicle Forward, Stop and Backward

4. Play on a smooth surface to have the optimum performance
5. Remember to switch OFF the power of the Vehicle and Transmitter after playing
6. The optimum control range is up to 30m outdoors

### Performance Tips

1. Do not drive on grass, dirt, sand, dust, carpet or go through water depth over 1cm
2. Do not drive in windy or rainy weather
3. Avoid the vehicle directly impacting with obstacles
4. Switch OFF the power when not in use to prevent damage of the Vehicle and Transmitter due to leakage of electrolytes from batteries
5. Remove all batteries from the Vehicle and Transmitter when not in use for a long period
6. Keep fingers, hair and loose clothing away from wheels
7. The operating range can be affected by a variety of factors
  - a) Low voltage of batteries in the Transmitter or Vehicle
  - b) Interference from other items that emit radio frequency signals
8. Outdoor usage is recommended in order to get optimum control range
9. It is recommended to play with the vehicle on a clean and smooth surface
10. Clean the battery compartment to make sure it is free from dust to prevent poor contact of the batteries

### Cautions

1. Do not attempt to disassemble the Vehicle or Transmitter
2. Do not operate the Vehicle with same frequency with other player(s) in same location. It will interfere with the signal and cause the Vehicle's to lose control.
3. Make sure the batteries are installed with correct polarities (+/-) as shown inside the battery compartment
4. Remove the package and take out all accessories before giving the Vehicle and Transmitter to child to play

The packaging and instruction manual contain important information. Please keep them for future reference.

Warning! Choking Hazard. Not suitable for children under the age of 3 years due to small parts.

We reserve the right to improve/amend specifications and colours without notice.

Warning! The Antenna of the vehicle is not to be inserted into socket outlets.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### Disposal of batteries

Batteries should not be disposed of the household waste. As the consumer, you are legally obligated to return batteries containing harmful substances and all other used batteries. You can hand in your old batteries at public collection points in your area or wherever batteries are sold. You will find these chemical abbreviations along with crossed-out refuse bin on batteries containing harmful substance:

Pb= Battery contains lead

Cd=Battery contains cadmium

Hg= Battery contains mercury
